**Non-wetting**

Dry Fog Humidifiers **AKIMist® "E"**

Compact, efficient, energy-saving humidifiers
1

What is Dry Fog?
Dry Fog is ultra-fine “non-wetting” fog, which doesn’t wet the objects it touches. AKIMist® “E” produces a large amount of Dry Fog.

2

Why is Dry Fog non-wetting?
Small droplets rebound from an object, but large droplets burst and wet the object. Dry Fog droplets are so fine that they do not burst or wet the objects it touches.

3

How our Dry Fog is produced
Atomized droplets, sprayed out from the two orifices apart, collide with each other in the center. Simultaneously they generate ultrasonic waves of 33–40 kHz to further atomize the droplets and homogenize their size.

AKIMist® "E" Dry Fog Humidifiers

Compact, efficient, energy-saving humidifiers create quality fog with low air consumption!

**Materials**
- Body: PP, Stainless steel 303
- Nozzle: Stainless steel 303, PPS, fluorocarbon resin
- Other parts: NBR, FKM (O-ring, Packing)

**Mass**
- Approx. 340 g (Loaded)

**Features**
- Quality fog reaches over four meters horizontally, providing effective humidification.
- Up to four nozzles can be mounted per body.
- Compact body structure keeps free from bacteria.
- Automatic humidity control is available with a humidity controller.

Note:
- Before disassembling, close the water valve.
- As main parts are made of plastic, handle AKIMist® "E" with care.
  (For details, see Instruction Manual.)
- Stop plugs are enclosed to reduce the number of nozzles used.

**Applications**
- Humidification: Textile factory, mushroom nursery, poultry incubation, fermentation room, cold storage for food, and more
- Moisture control: Textile, paper, plywood, etc.
- Preventing dust adhesion: Plastic molding, bag-making, painting line
- Dust suppression: Painting line, foundry, ceramic fabrication
- Curing: Concrete
- ESD prevention/Static electricity control: Printing, textile, painting line, plastic film, plastic molding, assembly line of electronics, paper, and more

**Long life technology**

- PTFE nozzle tip is highly resistant to clogging.
- Main parts are quickly detachable by hand.
  Hand-screw plug with built-in packing makes maintenance easier.
Cardboard factory

Sauter mean droplet diameter: 7.5 μm
Spray volume: 2.4 L/hr at 0.3 MPa (air pressure)

03C nozzle type with clog-resistant nozzle tip produces non-wetting Dry Fog (ultra-fine fog) of uniform quality.
Our Dry Fog, with its ability to humidify target spaces without wetting nearby machines or products, is ideal for use in electronics factories or where wetting is not allowed.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Sauter mean droplet diameter: 7.5 μm</td>
<td>Spray volume: 2.4 L/hr at 0.3 MPa (air pressure)</td>
</tr>
</tbody>
</table>

One 03C nozzle should be good for spaces of 100 m³ (3,500 ft³), though it depends on various conditions.

Mushroom farm

Sauter mean droplet diameter: 10 μm
Spray volume: 3.0 L/hr at 0.3 MPa (air pressure)

04E nozzle type: Scratch-resistant nozzle tip, made of metal.

<table>
<thead>

</table>

03B type with PTFE nozzle tip and spray volume of 3.3 L/hr per nozzle is also available. For details please contact us.
Optional/Related products

AE-UT Adaptor (optional)

AE-UT Adaptor enables you to adjust spray direction as desired, just by installing it between the nozzle and the humidifier body. You can easily attach and remove it by hand.

Chemical-resistant type is also available.

Note: Stop spraying before you change the direction.

Pipe Connection Kits (optional)

Convenient pipe connection kits for easy installation of AKIMist® "E". These kits come assembled.

Hanging-down (NP) Kit (w/o plate)  Wall Mounting Kit  Hanging-down Kit

- Rc 1/4" threaded connection.
- Bolts for fixing mounting plate are not included and need to be prepared by customers.
- The diameters of holes on the plate are 9 mm.
- Rc 1/4" threaded connection.
- Bolts and hanging fixture are not included and need to be prepared by customers.
- The diameter of hole on the plate is 11 mm.
- Rc 1/4" threaded connection.

Note: Gray parts are NOT included in the kit.
These pipe connection kits are not chemical resistant.

How to order

Please use this coding system to send an inquiry or to order for a specific model.
To add a pipe connection kit, please specify the connection kit type in [ ].

Example: AE-1 (03C) + [Hanging-down Kit]

Number of nozzles  Nozzle type  Type of pipe connection kit
1  (03C)  Hanging-down (NP) Kit (w/o plate)
2  (03B)  Wall Mounting Kit
3  (04E)  Hanging-down Kit
4

Note: Up to four nozzles can be mounted on one AKIMist® "E".
**Chemical-resistant AKIMist® "E" TN**

Titanium is applied to the liquid contact parts, for spraying of chemical solution.

Note: This product is sold without pipe connection kit.

(Available only with nozzle type 03C)

Note: Safety valve is set at 0.4 MPa.

**Applications**

- Disinfection, sterilization in food factories, hospitals/ pharmaceutical plants
- Disinfection, deodorization in egg farms, livestock barns

---

**Dry Fog Humidifier Kit**

All the components for an efficient humidification system in one DIY kit. Just supply the electricity and compressed air.

- You can choose the contents of AE-KIT freely to suit your factory size and layout.
- Includes piping and connectors for tap water and air, you can install them easily, and keep optimal humidity. (AKIMist® "E" is installed on a wall.)
- One AE-KIT is good for spaces of up to 800 m³. Please contact us for an inquiry sheet.

Includes:
- Nozzle unit (AKIMist® "E"), Control unit, Water (filter) unit, and Piping unit

---

**Portable Dry Fog Humidifier Set**

No piping work necessary.

Easy, convenient humidification for immediate usage in any place with an air supply.

- AKIMist® "E" portable humidifier set with a stand unit and water pressure tank. No installation work required.
- Easy automatic control with a humidity controller (optional).
- Ideal for spot humidification around machinery and use in a small space up to 100 m³.

Includes:
- AKIMist® "E", Stand with wheels, Telescopic pole, Water tank, Gauge-mounted pressure regulators, and Mounting unit

**Option** Compact humidity controller set

---

**Chemical-resistant AKIMist® "E" TN**

**Option** Compact humidity controller set
installation & ancillary devices

For minimal maintenance and long life, clean air and purified water must be supplied to the system. IKEUCHI, having vast expertise, provides a wide range of ancillary devices for purifying water/air and automatic humidity control.

Humidity Controllers

Humidity controller, humidity sensor, and solenoid valve unit work together to provide automated control that maintains the specified humidity level.

Humidity Controller (RHC-C11)
(Compact type with humidity sensor)

- Digital display of present humidity and target humidity
- Compact size to fit any place
- Measurement accuracy: +/-3%
- Supply voltage: 100–240 VAC
- Range of operation 0–85% RH (0–50°C)

Humidity Controller (RHC-D**B)
(Controller model numbers are entered in **.)

- Digital display of present humidity and target humidity
- Measurement accuracy: +/-3%
- Supply voltage: 100–110 VAC or 200–220 VAC
- Using a single controller, up to four zones spread over a wide area can be controlled individually.

Solenoid Valve Unit

A solenoid valve and reducing valve are bundled together as a unit for pressure relief. When the humidifier stops spraying, the remaining air pressure in the piping is instantly relieved, so that only fine fog is sprayed.

Air relief circuit
When the solenoid valve unit is installed far from AKIMist® “E”, spray may become coarse when stopping. In such cases, please install another solenoid valve for air relief between the solenoid valve for spray ON/OFF and AKIMist® “E”. The solenoid valve for air relief should operate in reverse with the spray-ON/OFF solenoid valve.
For removal of dust and moisture contents over 0.3 μm from the compressed air with micro-fiber.
Available in a variety of sizes.
Air ancillary device set includes an air filter and oil filter with a manual discharging drain and nipple.

For removal of foreign particles over 5 μm.
Available in a variety of sizes.
Water ancillary device set includes a water filter, a pressure regulator and nipple.

Benefits of Humidification

1. Static Charge Prevention

Helps to eliminate static electricity problems, improve product quality, and reduce the number of defects.

2. Energy-Saving Effect

Our Dry Fog humidification system also yields a cooling of about 2°C, which helps to reduce air conditioning cooling costs.

Energy cost for Dry Fog humidification is only one-fifth of that for steam humidification.

3. Promoting better worker health

Many of our customers say, “Worker absences caused by illness has reduced after the installation of AKIMist® "E".” Maintaining a relative humidity level over 50% dramatically reduces cold viruses, flu viruses and so forth, and creates more comfortable working environments.
Humidity control suited to each printing press type and process has a big impact.

- AKIMist® has quickly gained acceptance as nozzle-type humidification systems are becoming popular in the printing industry.
- AKIMist® has the best track record in the Japanese printing industry, with over 30 years of strong experience.
- For sheet-fed printing, UV printing, Flexo printing and others, we have the best-suited solutions for all kinds of printing presses.

Improved productivity and quality, reduced waste paper

Paper jams, poor folds, etc. → Solved by controlling humidity to around 50% RH

Field Textiles

- Improved productivity
- Thread breakage is prevented and productivity improved.
- Prevented pass weft from sticking.
- Prevented defects due to static electricity.

- Safety precautions
- Reduced the risk of ignition in paint and ink mixing processes.
- Allowed humidification for processes where it had been previously thought impossible.
- Reduced risk of fire, which could lead to loss of life and loss of public trust.

We have numerous proven solutions for industries beyond the above cases.

These effects depend on factory conditions.
Spray Droplet Size by Various Humidifiers

Shown below are pictures of droplets collected by Immersion Sampling and droplet diameter distribution measured by the laser analyzer. (The vertical axis is for droplet diameter, and the horizontal for the proportional number of droplets.)

**AKIMist® "E" 03C/04E nozzle type (Dry Fog)**

- Sauter mean droplet diameter: 10 μm or less
- Max. droplet diameter: 50 μm or less

**Why Dry Fog doesn't get things wet:**
Uniform fog, having no large droplets, humidifies target spaces effectively without getting anything wet.

We define Dry Fog as a very fine fog with a uniform, mean droplet diameter (average fog droplet size) of 10 μm or less.

**Other kinds of humidifiers**

- **Conventional pneumatic spray nozzle**
  - Large droplets
  - Sauter mean droplet diameter: 12.3 μm

- **Spinning disk type**
  - Large droplets
  - Sauter mean droplet diameter: 12.2 μm

- **Ultrasonic type**
  - Large droplets
  - Sauter mean droplet diameter: 12.8 μm

**Why other humidifiers wet things:**
Even though the mean droplet diameter is small, large droplets included in spray distributions will eventually cause wetting.

Note: Specifications and contents noted in this catalog are subject to change without prior notice.
